is available in electronic format (Excel/Word/PDF).

FOREWORD

The Philippine Statistics Authority (PSA) releases the Second Quarter 2022 Value of Production in Philippine Agriculture and Fisheries.

The report covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 20 commodities for fisheries. It presents the value of agricultural production at constant 2018 prices and at current prices.

PSA welcomes comments and suggestions from its data users, clients, and stakeholders for the improvement of this report.

TECHNICAL NOTES ON THE PREPARATION OF VALUE OF PRODUCTION IN PHILIPPINE AGRICULTURE AND FISHERIES REPORT

The Value of Production in Philippine Agriculture and Fisheries report presents the accomplishments of agriculture and fisheries during a particular reference period. The value of production is at constant 2018 prices and at current prices. The valuation is also done by commodity group (crops, livestock and poultry, and fisheries). These serve as inputs in the estimation of Gross Value Added (GVA) in agriculture and fishery.

The value of production in agriculture and fisheries covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 20 commodities for fisheries.

A. Sources of Basic Data

The generation of the value of production requires data on volume of production and farmgate prices. These data are sourced from the following PSA surveys and administrative-based records from other government agencies:

Variable	Source
1. Volume of Production by commodity	
a. Crops	Palay Production Survey (PPS)
	Corn Production Survey (CPS)
	Crops Production Survey (CrPS)
b. Livestock and Poultry by commodity	Backyard Livestock and Poultry Survey (BLPS)
	Commercial Livestock and Poultry Survey (CLPS)
c. Fisheries	Quarterly Municipal Fisheries Survey (QMFS)
	Quarterly Inland Fisheries Survey (QIFS)
	Quarterly Commercial Fisheries Survey (QCFS)
	Quarterly Aquaculture Survey (QAqS)
2. Farmgate Prices	
a. Crops	Farm Prices Survey (FPS)
b. Livestock and Poultry	BLPS CLPS
c. Fisheries	QMFS
	QIFS
	QCFS
	QAqS
3. Administrative Data	
a. Volume of Production of Centrifugal Sugar and Raw Sugar	Sugar Regulatory Administration (SRA)
b. Dairy Production and Price for Goat and Cattle	National Dairy Authority (NDA)
c. Dairy Production and Price for Carabao	Philippine Carabao Center (PCC)
d. Volume and Value of Commercial Fish Unloadings	Philippine Fisheries Development Authority (PFDA), Local Government Units (LGUs), and Privately Managed Landing Centers
e. Volume and Value of Municipal Fish Unloadings	PFDA and LGUs

B. Estimation Procedure

The valuation of agriculture and fisheries production is prepared quarterly. It is done as follows:

At Constant 2018 Prices

Valuation at constant prices is done by multiplying the quarterly volume of production of each commodity by the 2018 average farmgate price.

Formula:

$$VP_o = Q_t \times FGP_o$$

Where:

VP_o = Value of production at constant 2018 prices;

Q_t = Volume of production for the current period; and

FGP_o = Farmgate price at constant 2018 prices

At Current Prices

Valuation at current prices is done by multiplying the quarterly volume of production of each commodity by the average farmgate price during the reference year.

Formula:

$$VP_t = Q_t \times FGP_t$$

Where:

VP_t = Value of production at current prices;

Q_t = Volume of production for the current period; and

FGP_t = Farmgate price at current prices

The average prices of corn, coconut, banana, mango, tobacco, coffee, and onion are weighted using varietal classification, while cassava price is weighted by its use (i.e., food and industrial).

For sugarcane, there is no available data on sugarcane price. The PSA's Farm Prices Survey (FPS) generates prices of centrifugal sugar per kilogram while the Sugar Regulatory Administration (SRA) releases data on volume of centrifugal sugar and raw sugar. Thus, the farmgate price of sugarcane was derived by multiplying the volume of raw sugar by the price of centrifugal sugar. The resulting value is multiplied by 0.65 to indicate that 65 percent of the total value of raw sugar produced is the value of the product of agriculture. This is based on the prevailing 65-35 planter-miller sharing system. The total value credited to agriculture was divided to the total volume of sugarcane to derive the average price of sugarcane.

To harmonize the product form of coffee for the volume of production and price, conversion is made for the price. The farmgate price of dried coffee beans is multiplied by 60 percent (Food and Agriculture Organization's conversion factor from dried coffee beans to dried coffee berries¹) to derive the farmgate price of dried coffee berries.

In the case of "other crops", a set of indicator commodities was established. These indicator commodities are used to get the weighted price for "other crops". It is derived by dividing total value of production by the total volume of production of the indicator commodities. This weighted price is used in computing the value of "other crops" production.

The prices of livestock and poultry are weighted using the type of farm (i.e., commercial and backyard).

For fisheries commodities, the prices are derived from the value of production at current prices divided by the volume of production of the reference year.

C. Definitions

Value of Production at Constant (2018) Prices – refers to valuation of transactions, wherein the influence of price changes from the base year (2018) to the current year has been removed.

Value of Production at Current Prices – is the value based on prices during the reference year.

VALUE OF PRODUCTION IN PHILIPPINE AGRICULTURE AND FISHERIES
SECOND QUARTER 2022

HIGHLIGHTS

Figure 1. Value of Production in Agriculture and Fisheries at Constant 2018 Prices
Growth Rates
Q2 2021 and Q2 2022

Source: Philippine Statistics Authority

The **value of production in agriculture and fisheries at constant 2018 prices**¹ decreased by -0.6 percent in the second quarter of 2022. Crops and fisheries recorded contractions in the value of production. Meanwhile, expansions in the value of livestock and poultry production were noted in the second quarter of 2022. At current prices, the value of production in agriculture and fisheries amounted to PhP 532.79 billion, which was 6.2 percent higher from the previous year’s level. *The value of production in agriculture and fisheries at constant 2018 prices registered a -0.4 percent decline from January to June 2022.* (Tables 2a, 4a, and 5a, and Figure 1)

Crops recorded a -2.8 percent decrease in the value of production in the second quarter of 2022. It accounted for 54.9 percent of the total value of production in agriculture and fisheries. Value of production for palay and corn went up by 0.7 percent and 3.3 percent, respectively. Moreover, onion registered a 20.2 percent increment. Likewise, higher values of production were noted for mungo by 6.4 percent, sweet potato by 4.0 percent, calamansi by 2.3 percent, coconut by 2.0 percent, ampalaya by 1.8 percent, cacao by 1.4 percent, cassava by 0.9 percent, banana by 0.4 percent, and eggplant by 0.2 percent.

On the other hand, declines in the value of production were noted for sugarcane by -53.8 percent, coffee by -7.1 percent, tomato by -6.4 percent, mango by -3.8 percent, potato and cabbage by -3.3 percent each, pineapple by -1.4 percent, abaca by -1.3 percent, tobacco by -1.2 percent, and rubber by -0.6 percent. The value of “other crops” production decreased by -12.9 percent. At current prices, the value of

crop production at PhP 265.98 billion indicated a -0.1 percent drop from the previous year's record. *For the first half of 2022, the value of crop production at constant 2018 prices recorded a -2.2 percent drop this period.* (Tables 2b, 3b, 4b, and 5b)

During the second quarter of 2022, **livestock**, which contributed 14.6 percent to the total value of production in agriculture and fisheries, increased by 2.1 percent. Improvements were observed in the value of production of dairy at 22.2 percent, hog at 3.0 percent, and cattle at 0.9 percent.

On the other hand, declines in the value of production were recorded for goat at -6.7 percent and carabao at -3.9 percent. At current prices, the value of livestock production, which amounted to PhP 94.43 billion, was 10.7 percent higher than the previous year's level. *From January to June 2022, the value of livestock production at constant 2018 prices increased by 0.6 percent.* (Tables 2c, 3c, 4c, and 5c)

The value of **poultry** production expanded by 7.8 percent in the second quarter of 2022. It shared 14.7 percent in the total value of production in agriculture and fisheries. Double-digit increments were noted for duck eggs at 11.5 percent and chicken eggs at 10.5 percent. Likewise, the value of chicken production increased by 6.9 percent. In contrast, value of duck production declined by -7.5 percent in the second quarter of 2022. At current prices, the value of poultry production amounted to PhP 79.79 billion, an increase of 13.8 percent from the previous year's record. *In the first six months of 2022, value of poultry production at constant 2018 prices went up by 10.0 percent.* (Tables 2c, 3c, 4c, and 5c)

Fisheries with 15.8 percent share in the total value of production in agriculture and fisheries, dropped by -2.3 percent. Increases in the value of production were registered for the following species: bigeye tuna (tambakol/bariles) by 46.7 percent, squid (pusit) by 36.9 percent, fimbriated sardines (tunsoy) by 36.1 percent, yellowfin tuna (tambakol/bariles) by 23.6 percent, seaweed by 21.2 percent, grouper (lapu-lapu) by 20.8 percent, and skipjack (gulyasan) by 18.8 percent, big-eyed scad (matangbaka) by 13.8 percent.

Meanwhile, double-digit decreases were recorded for tiger prawn (sugpo) by -30.8 percent, blue crab (alimasag) by -28.5 percent, frigate tuna (tulingan) by -21.8 percent, mudcrab (alimango) by -20.9 percent, cavalla (talakitok) by -16.6 percent, and milkfish (bangus) by -15.5 percent. Declines in the value of production were also noted for tilapia at -9.7 percent, *Bali sardinella* (tamban) at -9.0 percent, slipmouth (sapsap) at -7.0 percent, and threadfin bream (bisugo) at -4.8 percent. Roundscad (galunggong) and Indian mackerel (alumahan) contracted by -2.8 percent and -1.7 percent, respectively. Collectively, the value of "other fisheries" grew by 10.0 percent during the quarter. At current prices, the value of fisheries production amounted to PhP 92.59 billion. This was 15.4 percent higher compared to the previous year's level. *For the first six (6) months of 2022, the value of fisheries production at constant 2018 prices dropped by -3.9 percent.* (Tables 2d, 3d, 4d, and 5d)

¹All value of production growth rates are at constant 2018 prices
