## FOREWORD

The 2020 Commodity Fact Sheets is the 27<sup>th</sup> edition of the annual publication released by the Philippine Statistics Authority (PSA). The report is a compilation of basic statistical information for selected agricultural commodities.

Each commodity profile contains the following information: production, area, yield, share in value of production in agriculture and fisheries, prices, cost of production, exports, imports, and domestic utilization. The report aims to serve as a quick yet comprehensive reference material for the various data users and stakeholders in the agriculture sector.

The PSA hopes to further improve the content and coverage of this report. Thus, readers are encouraged to give their comments and suggestions to make the report more useful and relevant.

**TECHNICAL NOTES**

1. Volume of production is expressed in metric tons and value of production is expressed in Philippine peso (PhP). The values of commodities at current prices are taken from the Value of Production in Philippine Agriculture and Fisheries, a quarterly report published by the Philippine Statistics Authority (PSA). For commodities not highlighted in the report, the values are derived by multiplying the year's volume of production with the average farmgate price in the same year.
2. The share in Value of Production in Agriculture and Fisheries is provided only for the commodities highlighted in the Value of Production in Philippine Agriculture and Fisheries.
3. Major locations are the top provinces based on area planted for permanent crops and area harvested for temporary crops.
4. Major producers are the top provinces based on volume of production.
5. Provinces with highest yield are provinces with the biggest production per hectare or per bearing tree.
6. Data on cost of production per kilogram are updated estimates based on given set of assumptions and procedures. The costs of production of temporary crops are expenses incurred in production during the period while those of permanent crops refer to maintenance costs of the farms.
7. Data on volume of exports and imports are expressed in net kilograms, metric tons, square meters, and pieces. The data on value are Free on Board (FOB) value for exports and imports expressed in PhP terms.
8. Major markets/suppliers are the top exporting/importing countries based on volume.
9. Data on domestic utilization are represented by net food disposable (NFD) and quantity of commodity that goes to processing. These data are generated by the Supply Utilization Accounts of Selected Agricultural Commodities. NFD is the amount of food available in its original (unprocessed) form for human consumption. NFD is the balance or the remainder after all the "use" parameters are taken into account.
10. The following abbreviations are used in the report:

<b>PhP</b>	Peso
<b>mt</b>	Metric Ton
<b>kg</b>	Kilogram/s
<b>ha</b>	Hectares
<b>pcs</b>	Pieces
<b>sq.m</b>	Square meters
11. All data items in the report are sourced from the different divisions of the PSA.

CEREALS

**PALAY/RICE****AREA**

Historical Average (2011-2020):	4,690,734 ha
2020:	4,718,896 ha
Major Locations:	Nueva Ecija (6.8%), Iloilo (6.2%), Isabela (6.1%)

**PRODUCTION (Palay)**

Historical Average (2011-2020):	18,435,304 mt
2020:	19,294,856 mt
Value:	PhP 318,756.20 million
Major Producers:	Nueva Ecija (9.9%), Isabela (7.0%), Pangasinan (5.9%)

**YIELD**

Historical Average (2011-2020):	3.93 mt/ha
2020:	4.09 mt/ha
Provinces with Highest Yield:	Nueva Ecija (5.97 mt/ha), Ilocos Norte (5.17 mt/ha), Davao del Sur (5.16 mt/ha)

**SHARE IN VALUE OF PRODUCTION IN AGRICULTURE AND FISHERIES**

21.8%

**PRICE**

Farmgate (Palay):	Fancy, dry (PhP 18.85/kg), Other variety, dry (conversion to 14% mc ) (PhP 16.76/kg)
Retail (Rice):	Rice regular milled loose (PhP 38.64/kg), Special (PhP 50.23/kg), Well milled loose (PhP 42.83/kg)

**AVERAGE COST OF PRODUCTION PER KILOGRAM**

All types (PhP 11.52), Irrigated (PhP 11.96),  
Non-irrigated (PhP 13.61)

**EXPORTS**

	<b><u>Rice in the husk, suitable for sowing</u></b>	<b><u>Other rice</u></b>
Volume:	20.91 mt	2.02 mt
Value:	PhP 8.36 million	PhP 133,328.94
