Terms of Use: The Commodity Flow in the Philippines is a publication of the Philippines Statistics Authority (PSA). The PSA reserves exclusive right to reproduce this publication in whatever form. Should any portion of this publication be included in a report/article, the title of the publication and the PSA should be cited as the source of the data. The PSA will not be responsible for any information derived from the processing of data contained in this publication.

FOREWORD

The **2020 Commodity Flow in the Philippines** is an annual publication of the Philippine Statistics Authority (PSA) that provides data on the quantity and value of regional commodity flow by mode of transport, and by port of origin and destination. This publication also includes data on the number of passengers by province and region.

Data on the inflow and outflow of commodities in the different regions serve as bases in the formulation and implementation of the various regional development programs like countryside development and port planning.

The PSA sincerely acknowledges the unwavering support extended by the Philippine Airlines (PAL), Philippine Ports Authority (PPA), and various shipping companies in providing the source documents needed in compiling domestic trade statistics.

Explanatory Note

2020 Commodity Flow in the Philippines

Introduction

The Commodity Flow in the Philippines is a compilation of data on commodities carried through air and water transport systems in the country. It gathers information on the movement of commodities within the Philippines to enable policymakers to monitor domestic trade.

The domestic trade data contained in this report pertains to the flow of goods through airports and seaports in the country, whether for government or private use, or for commercial purposes. Trade in land is excluded because of the absence of approach/system to capture such information. Since 2007, rail transport statistics are excluded due to the rehabilitation and upgrading of the Philippine National Railway (PNR).

Coasting manifests are collected from major ports and other active seaports listed by the Philippine Ports Authority (PPA) all over the country. On the other hand, air waybills are collected from all domestic airports operated by the Philippine Airlines (PAL) nationwide.

There are two kinds of domestic trade statistics in this report, namely:

- a. Air trade statistics which capture movement of commodities from one airport to another within the country through air transport system; and
- b. Coastwise trade and coastwise passenger statistics which capture the flow of commodities/passenger from one port to another within the country through water transport system.

Data on the inflow and outflow value of commodities in the different regions of the country are used to construct inter-regional and inter-industry relation tables. These serve as bases in the formulation and implementation of various regional development programs like countryside development and port planning.

Coverage

The following are excluded in the compilation of domestic data: (1) fishing ports; (2) goods transported by vessels of the Philippine Navy; (3) fish and other marine products landed direct from the sea; (4) service cargoes for consumption by vessel crew; and (5) cadaver.

Sources of Data

The source documents for coastwise trade statistics are the Outward Coasting Manifests and Coastwise Passenger Manifests for cargo and passenger, respectively. These forms are submitted by masters of vessels plying the inter-island ports to the collectors or authorized representatives of PPA before the vessel leaves the port area. The Philippine Statistics Authority (PSA) personnel collects copies of these documents from the PPA designated collection points in the provinces.

On the other hand, the source document for air trade statistics is the air waybill issued by PAL to every consignee. The acceptance and sales clerks of the airline prepare an extra copy of every air waybill issued and the corresponding sales report is collected by PSA field personnel.

Data Items

The coasting cargo manifest contains information on port of origin, port of destination, area of occupancy, type of handling, description of commodity, weight, value, and freight charges.

On the other hand, the air waybill contains the station of destination of the commodity, station of origin of the commodity, actual gross weight, declared value, equivalent volume weight, rate basis, rate class, description of commodity, issuing office, PAL charges, freight forwarder charges, and total freight charges.

Only the actual gross weight, declared value, description of commodity, station of origin, station of destination, and total freight charges are included in the domestic trade statistics.

Commodity Classification

The commodity classification used in the compilation of data is the 1993 Philippine Standard Commodity Classification (PSCC) Revision 2, which is aligned with the United Nations 1985 Standard International Trade Classification (SITC) Revision 3.

The classification is presented in four levels of details, namely: section, division, group, and item. A unique numeric code identifies each commodity. The first digit of the numeric code identifies the section; the first two digits, the division; the first three digits, the group; and the five digits, the item.

Processing

Documents collected from the provincial sales offices, stations, and collection points of PPA are sorted by port or station and by month; recorded; bundled and numbered by type of document, by port or station and by month. After which, the documents undergo manual and machine processing to ensure that all documents are checked/verified as to completeness and accuracy of entries. Manual and machine processing done are the following:

1. Transcription/coding of entries

This is done by transcribing the data items from the coasting manifest to processing sheet (PS) to facilitate data entry;

2. Verification of entries from source documents to PS

This is done to check if all applicable data items from the source documents are transcribed completely and accurately to the PS;

3. Data encoding

This is done by encoding all the data from the PS for coastwise and passenger documents. On the other hand, entries from the air waybills are directly encoded using the Domestic Trade Data Processing System (DT-DPS) Version 1.1; and

4. Validation of data

This is to check if the derived price (value/quantity) for each commodity is appropriate for the region/province.

Geographic Classification

In this publication, domestic trade statistics are classified by geographic area using the Philippine Standard Geographic Code (PSGC) as of 30 September 2019.

Other Available Data

There are other unpublished statistical tables available at the Trade Statistics Division (TSD) of the Economic Sector Statistics Service (ESSS). These can be requested through a letter addressed to the Office of the National Statistician and Civil Registrar General (NSCRG) at the PSA Complex, East Avenue, Diliman, Quezon City.

HIGHLIGHTS

2020 Commodity Flow in the Philippines

Table A. Quantity and Value of Domestic Trade
2019 and 2020

Indicator	2019		2020	
	Quantity/ Value (in millions) ^a	Year-on- Year Growth (in percent)	Quantity/ Value (in millions) ^a	Year-on- Year Growth (in percent)
Quantity	25.89	0.4	16.23	-37.3
Value	834,717.77	-2.9	590,658.47	-29.2

a – quantity in tons and value in PhP
Source: Philippine Statistics Authority

A. Quantity

1. Quantity of domestic trade declined

The total quantity of domestic trade in 2020 was recorded at 16.23 million tons, representing an annual decrement of -37.3 percent. In 2019, the annual increase was 0.4 percent. Almost all (99.9%) of the commodities were traded through water (coastwise) while the rest were traded through air. (Figure 1 and Table A)

Figure 1. Quantity of Domestic Trade by Mode of Transport
2019 and 2020

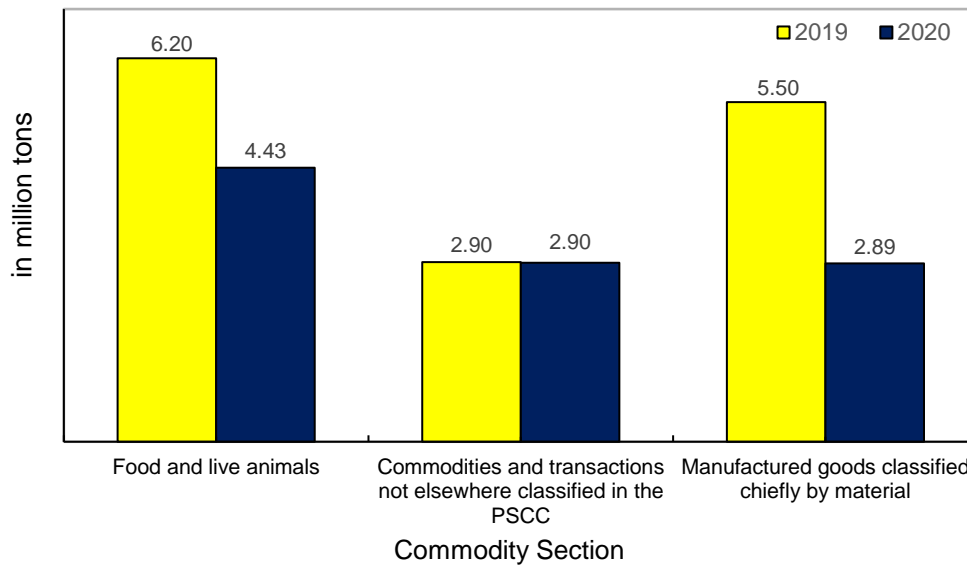

Note: Details may not add up to total due to rounding

2. Food and live animals led in terms of quantity of domestic trade

By commodity section, food and live animals topped in terms of quantity of domestic trade in 2020 with 4.43 million tons or a share of 27.3 percent to the total. This was followed by commodities and transactions not elsewhere classified with 2.90 million tons (17.9%) and manufactured goods classified chiefly by material with 2.89 million tons (17.8%). (Figure 2 and Table 1)

Figure 2. Quantity of Domestic Trade for Top Three Commodity Sections, 2020

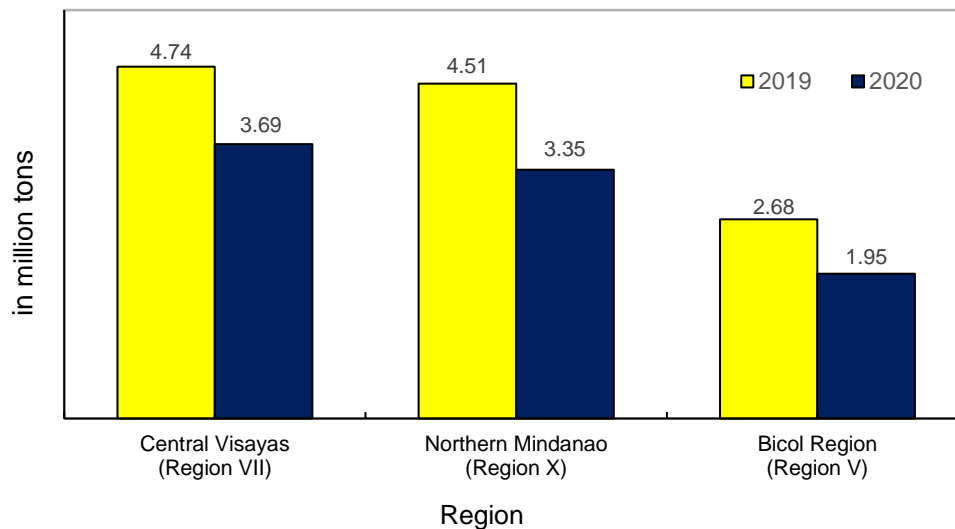

Source: Philippine Statistics Authority

3. Central Visayas accounted for the highest quantity of traded commodities

By region, Central Visayas (Region VII) recorded the highest quantity of traded commodities with 3.69 million tons or 22.8 percent share to the total in 2020. This was followed by Northern Mindanao (Region X) with a quantity of 3.35 million tons (20.6%) and Bicol Region (Region V) with 1.95 million tons (12.0%). (Figure 3 and Table 2)

Figure 3. Quantity of Domestic Trade for Top Three Regions
2020

B. Value

1. Value of domestic trade dropped

Domestic trade value is the *outflow value* which refers to the value of commodities that goes out from a specified region/province to another region/province.

The total value of domestic trade in 2020 amounted to PhP 590.66 billion. This indicates a contraction of -29.2 percent from the PhP 834.72 billion value of domestic trade in 2019.

By mode of transport, the total value of traded commodities through water accounted for almost all (99.97%) of the total commodities that flow within the country, while the remaining were traded through air. (Figure 4 and Table 1)

Figure 4. Value of Domestic Trade by Mode of Transport
2019 and 2020

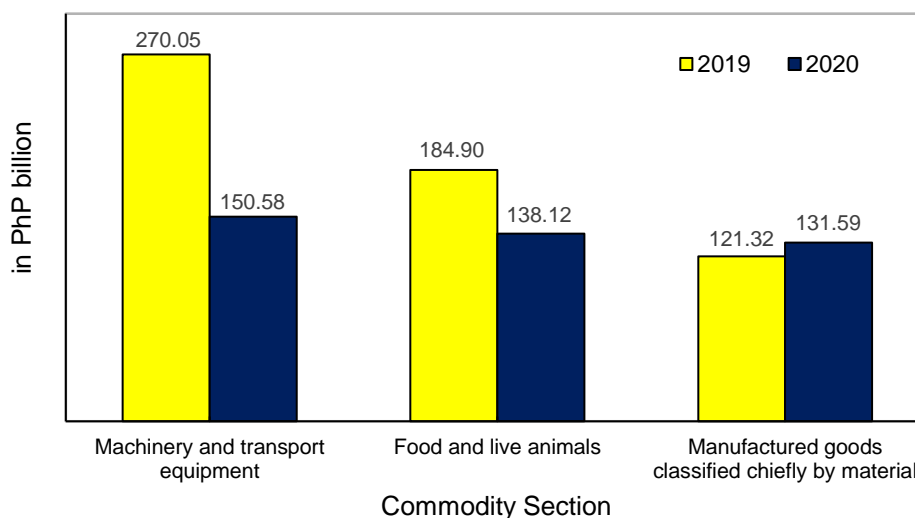

Note: Details may not add up to total due to rounding
Source: Philippine Statistics Authority

2. Machinery and transport registered the highest value of traded commodities

Machinery and transport equipment topped in terms of the value of traded commodities with PhP 150.58 billion or 25.5 percent share to the total. This was followed by food and live animals valued at PhP 138.12 billion (23.4%) and manufactured goods classified chiefly by material which amounted to PhP 131.59 billion (22.3%). (Figure 5 and Table 1)

Figure 5. Value of Domestic Trade for Top Three Commodity Sections, 2020

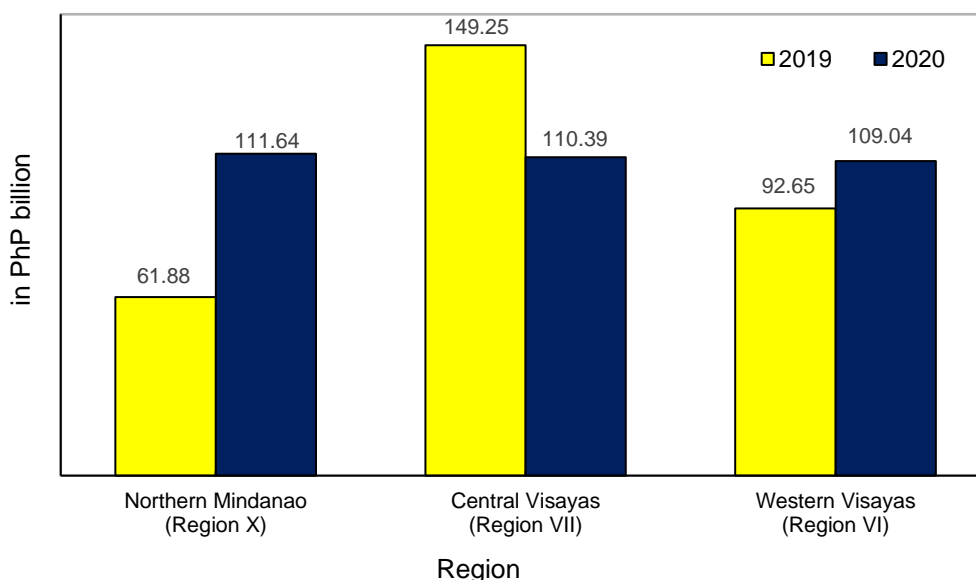

Source: Philippine Statistics Authority

3. Northern Mindanao recorded the highest value of traded commodities

Among the regions, Northern Mindanao (Region X) ranked first with a total value of traded commodities of PhP 111.64 billion or 18.9 percent share to the total in 2020. Central Visayas (Region VII) came next with traded commodities amounting to PhP 110.39 billion (18.7%), followed by Western Visayas (Region VI) with PhP 109.04 billion (18.5%). (Figure 6 and Table 2)

Figure 6. Value of Domestic Trade for Top Three Regions 2020

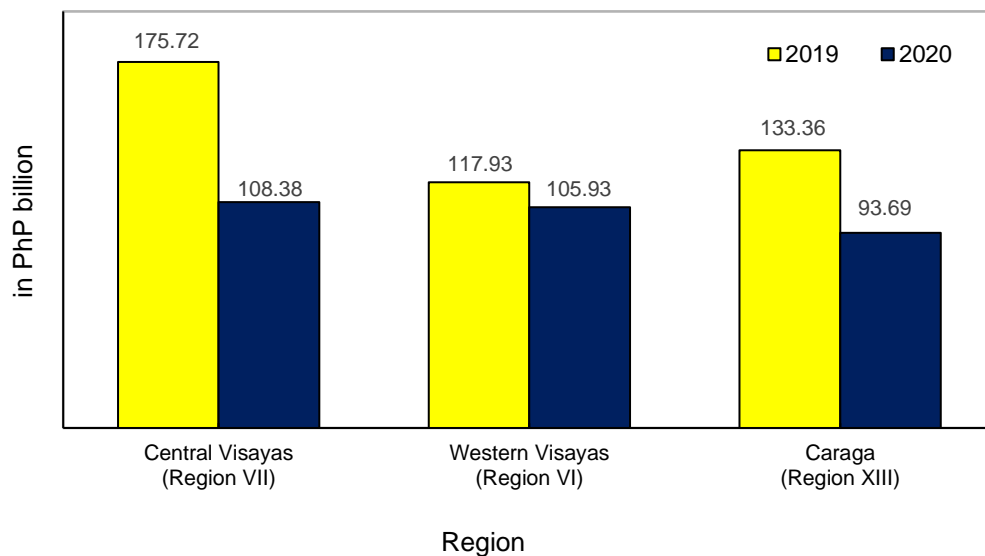

Source: Philippine Statistics Authority

4. Central Visayas led in terms of inflow value

Inflow refers to the value of commodities that enters a specified region/province from other regions/provinces.

By region, Central Visayas (Region VII) posted the highest inflow value of domestic trade of PhP 108.38 billion or 18.3 percent share to the total in 2020. This was followed by Western Visayas (Region VI) with inflow value of PhP 105.93 billion (17.9%) and Caraga (Region XIII) with PhP 93.69 billion (15.9%). On the other hand, Cagayan Valley (Region II) had the lowest inflow value which amounted to PhP 3.05 million. (Figure 7 and Table 3)

Figure 7. Inflow Value of Top Three Regions
2020

Source: Philippine Statistics Authority

5. Northern Mindanao recorded the highest trade balance

The *trade balance* is the difference between the outflow value and inflow value.

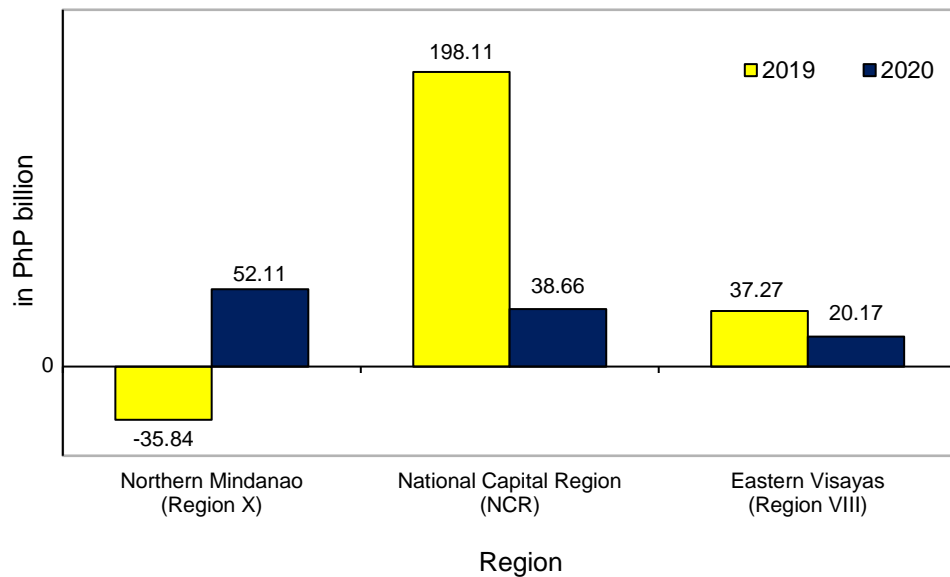

The top three regions with favorable (positive) domestic trade balances in 2020 were the following:

- Northern Mindanao (Region X), PhP 52.11 billion;
- National Capital Region (NCR), PhP 38.66 billion; and
- Eastern Visayas (Region VIII), PhP 20.17 billion.

On the other hand, the top three regions with unfavorable (negative) trade balances in 2020 were the following:

- Caraga (Region XIII), PhP 76.54 billion;
- Zamboanga Peninsula (Region IX), PhP 18.75 billion; and
- CALABARZON (Region IV-A), PhP 16.72 billion. (Figure 8 and Table 3)

Figure 8. Trade Balances for Top Three Regions
2020

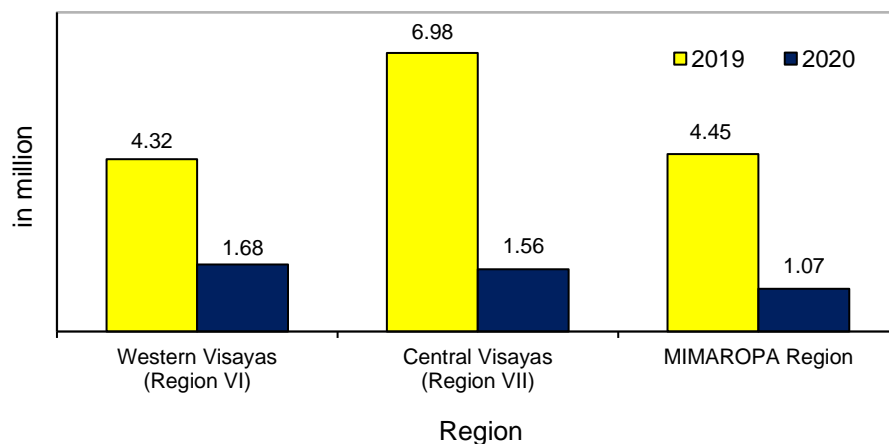

Source: Philippine Statistics Authority

6. Total number of passengers dropped

The total number of passengers in 2020 based on received records was recorded at 7.28 million, all were transported via water (coastwise). This indicates a contraction of -74.1 percent from the 28.13 million passengers in 2019.

Western Visayas (Region VI) recorded the highest number of passengers in 2020 of 1.68 million. This was followed by Central Visayas (Region VII) with 1.56 million passengers and MIMAROPA Region with 1.07 million passengers. (Figure 9 and Table 13)

GLOSSARY OF TERMS

Domestic commodity flow refers to the flow of commodities through the water, air, and rail transport system in the country.

Trade balance is the difference between the outflow and inflow, that is outflow minus inflow. A positive value indicates a favorable trade balance, while a negative value indicates an unfavorable trade balance.

Inflow refers to the total value of commodities coming into a specified region/province.

Outflow refers to the total value of commodities coming out from a specified region/province.

Port/Station of origin refers to the port or station where the cargoes originally came from.

Port/Station of destination refers to the port or station where the cargoes are destined for.

Region of origin refers to the regional location of the port or station where the cargoes originally came from.

Region of destination refers to the regional location of the port or station where the cargoes are destined for.

Freight refers to charges on cargoes paid for the transportation of goods for one port or station to another.

Value refers to the peso equivalent of a particular commodity.

Quantity or Weight refers to the total amount or volume of a particular commodity.

Dry bulk are commodities that are unpacked and handled in mass. They come in solid and pulverized forms requiring huge container vessels.

Liquid bulk or semi-liquid are commodities that are unpacked and handled in mass. They come in liquid and semi-liquid forms requiring huge container vessels.

Break bulk are commodities that come in packages, bales, bundles, crates, cartons, or any form whereby the handling of any single unit can be done conveniently by one or two men.

Containerized refers to homogenous or non-homogenous cargoes in solid, pulverized, semi-liquid, liquid, or gaseous and / or break bulk pre-slung / bundled or palletized form of any convenient practical combination thereof which are arranged in a steel closed or open box called container handled as a unit.
