## MESSAGE

The challenges and opportunities facing the agriculture sector compel us to provide everyone access to facts and statistics on production and marketing in order to assist policy makers, agriculturists, producers and traders in the quest for increased productivity.

We are therefore proud to share with you the Handbook on Selected Statistics on Agriculture. The statistics contained in this publication give us a clear picture of the development of Philippine agriculture in selected fields of concern. I am confident that this publication would provide relevant data required by our end-users.

May the use of this Handbook advance the interest of the agriculture sector.

A handwritten signature in black ink, appearing to read 'Escudero III', written in a cursive style.

**SALVADOR H. ESCUDERO III**  
*Secretary*

## **ACKNOWLEDGEMENT**

We wish to thank the following agencies for sharing with us their data: Agricultural Credit and Policy Council (ACPC), Asian Development Bank (ADB), Bureau of Animal Industry (BAI), Bureau of Fisheries and Aquatic Resources (BFAR), Central Bank (CB), Department of Budget and Management (DBM), Development Bank of the Philippines (DBP), Food and Agricultural Organization (FAO), Fertilizer and Pesticide Authority (FPA), National Food Authority (NFA), National Irrigation Authority (NIA), National Statistical Coordination Board (NSCB), National Statistics Office (NSO), Philippine National Bank (PNB), and Sugar Regulatory Administration (SRA).

We also wish to thank the National Dairy Authority and the Bureau of Agricultural Research for providing funding support for the conduct of the 1996 Listings of Dairy Farms/Enterprises and an Objective Survey and Data Validation activities for key commercial crops, respectively. These activities resulted in the revisions of data on dairy, cabbage, coffee, mango and abaca to more accurate levels.

## EXPLANATORY NOTES

1. Unless otherwise indicated, year refers to calendar year.
2. As a rule, figures from source publications are copied to the extent possible.
3. Figures may not add up to the totals due to the rounding-off.
4. The following symbols and abbreviations are used in the tables:

---	Data not yet available
-	None
R	Revised
P	Preliminary
MT	Metric Ton
HA	Hectare
KG	Kilogram
GNP	Gross National Product
GVA	Gross Value Added
SSLA	Stock Savings and Loan Association
BOP	Balance of Payments

5. Sources of data are the following:

ACPC	- Agricultural Credit and Policy Council
ADB	- Asian Development Bank
BAI	- Bureau of Animal Industry
BAS	- Bureau of Agricultural Statistics
BFAR	- Bureau of Fisheries and Aquatic Resources
CB	- Central Bank
DBM	- Department of Budget and Management
DBP	- Development Bank of the Philippines
FAO	- Food and Agriculture Organization
FPA	- Fertilizer and Pesticide Authority
FIDA	- Fiber Industry Development Authority
NFA	- National Food Authority
NIA	- National Irrigation Administration
NSCB	- National Statistical Coordination Board
NSO	- National Statistics Office
PhilCotton	- Philippine Cotton Corporation
SRA	- Sugar Regulatory Administration

## THE AGRICULTURAL ECONOMY OF THE PHILIPPINES

**Overall Performance.** In the last five (5) years, agriculture contributed 20.93 percent to 22.28 percent to the GDP. The share in the GDP could swell to about 32 percent if production of agro-based manufacturing is accounted for in the sector. In 1996, output contributions by sector were: 54.34 percent from crops; 26.8 percent from livestock and poultry and 18.86 percent from fisheries. During the same period agriculture grew by 3.46 percent.

**Population and Labor Force.** In 1995, about 41.9 percent of the population were dependent on agriculture for their livelihood. Agriculture was reported as the main source of income by 34.1 percent of the Filipino families. Of the 28.38 million members of the labor force in 1996, 39.28 percent were employed in agriculture. In particular, the sector accounted for 43.4 percent of total employment. It was noted that 48.8 percent of women employed were in the agriculture sector.

**Structure.** Based on the 1991 Census of Agriculture and Fisheries (CAF), there were 9.97 million hectares of agricultural lands. About 53.5 percent of the farmlands were used for growing temporary crops and 41.8 percent were covered by permanent crops. The 1991 CAF also showed that the country has about 2.4 million palay farms, 1.8 million corn farms, 2.7 million coconut farms and 208.6 thousand sugarcane farms. Hog and chicken were reported by 2.6 million farms and 3.6 million farms, respectively. With a total of 4.61 million farms counted, average farm area was placed at 2.16 hectares. Close to 37 percent of the farms were less than a hectare in size.

**Support Services.** In 1996, the government provided a P19.1 billion budget to support agricultural expenditures. Of the estimated P3,387.5 billion total loans granted in 1995, 1.84 percent were agricultural production loans. Another major factor that influences agricultural productivity is irrigation. As of December 1996, irrigation and drainage facilities covered about 1.22 million hectares of farmlands. As to inputs, the fertilizer requirements in the country are being addressed by supplementing domestic production with imports. In 1996, 42.9 percent of total fertilizer supply were imported.

**Production.** In 1996, crop production was led by palay at 11.3 million metric tons, corn at 4.1 million metric tons, coconut at 11.9 million metric tons and sugarcane at 23.6 million metric tons. The corresponding areas harvested (in million hectares) were: 3.95 for palay, 2.74 for corn, 3.09 for coconut and 0.38 for sugarcane. On the other hand, the livestock industry was dominated by hogs with a total inventory of 9.03 million heads in 1996 and an estimated production of 1.3 million metric tons. The poultry population was composed of 115.78 million chickens and 9.47 million ducks. Production estimates (in thousand metric tons) during the period were 852 for chicken and 206 for chicken eggs, 51 for ducks and 54 for duck eggs. Meanwhile, the country's large fishery sources generated a total of 2,769.2 million metric tons of fish. The increasing volume as well as unit value of the products brought up aquaculture contribution to total fish production to 35 percent.

**International Trade.** The 1996 preliminary figures on Philippine foreign trade indicated that agriculture generated \$2,306.6 million worth of export products. This amount was equivalent to 11.32 percent of the country's total export earnings. Coconut products continued to be the major dollar earners. On the other hand, agricultural imports accounted for about 10 percent of the country's total imports. The leading items on the import list included wheat and melin and milk and cream.

**Food Sufficiency.** Available indicators showed that the country's 1996 requirements for rice and corn were not met by domestic production. About 918 thousand metric tons of rice and 1,109 thousand metric tons of corn had to be imported during the year. Self-sufficiency was noted in other food commodities like coconut, sugar, rootcrops and most fruits and vegetables. In the case of livestock and poultry products, the country was dependent on domestic production except in the case of beef which recorded a total importation of 55.44 thousand metric tons. While there was self-sufficiency in most fish species, importations of 238.02 thousand metric tons of fish, crustaceans and mollusks and preparations were recorded during the year.
