

FOREWORD

The 2003 edition of the Selected Statistics on Agriculture is the fourteenth in a series published by the Bureau of Agricultural Statistics. Its format and design had been transformed into a pocket-sized handbook to make it truly handy. Data for a few commodities in the previous issues were revised to reflect results of data review and validation activities as well as the latest available information.

A comprehensive publication, the edition has an addendum on the latest data for the six cluster commodities namely, Rice, Corn/Livestock, Coconut, Sugarcane, Aquaculture (Seaweed, Bangus and Tilapia) and Coffee/Regional crops. Regional Contribution to total production for palay, corn, sugarcane, coconut, pineapple, banana, mango and coffee for CY 2002 are also included in this issue. Likewise, the regional distribution of production of livestock and fishery by sub-sector, i.e. marine, inland and aquaculture are presented. Each commodity sub-sector is accompanied by graphs at the end of the tables.

We hope that this handbook will be useful in the formulation of policies and programs aimed at the advancement of the Philippine Agriculture.

ROMEO S. RECIDE
Director

Acknowledgement

Our appreciation and gratitude to the following agencies for their cooperation and support in sharing with us their data: Agricultural Credit and Policy Council (ACPC), Asian Development Bank (ADB), Bureau of Animal Industry (BAI), Bangko Sentral ng Pilipinas (BSP), Department of Budget and Management (DBM), Development Bank of the Philippines (DBP), Food and Agriculture Organization (FAO), Fertilizer and Pesticide Authority (NIA), National Statistics Coordination Board (NSCB), National Statistics Office (NSO), Philippine National Bank (PNB), and Sugar Regulatory Administration (SRA).

We Also wish to thank the Ginintuang Masaganang Ani – High Value Commercial Crops (GMA-HVCC) Program Directorate for providing funding support for the conduct of objective surveys and data validation activities for high value commercial crops. These activities have helped raised the level of our confidence that the new generated estimates are now more accurate and reliable.

EXPLANATORY NOTES

1. Unless otherwise indicated, year refers to calendar year.
2. As a rule, figures from source publication are copied to the extent possible. In some instances, however, figures were rounded-off or combined.
3. Figures may not add up to the totals due to rounding-off.
4. The following symbols and abbreviations are used in the tables:

---	Data not yet available
-	None
MT	Metric ton
HA	Hectare
KG	Kilogram
GNP	Gross National Product
GVA	Gross Value Added
SSLA	Stock Saving and Loan Assn.
BOP	Balance of Payments

5. Sources of data are the following:

ACPC	-	Agricultural Credit and Policy Council
ADB	-	Asian Development Bank
BAI	-	Bureau Animal Industry
BAS	-	Bureau of Agricultural Statistics
BFAR	-	Bureau of Fisheries and Aquatic Resources
BSP	-	Bangko Sentral ng Pilipinas
CODA	-	Cotton Development Administration
DBM	-	Department of Budget and Management
DBP	-	Development Bank of the Philippines
FAO	-	Food and Agriculture Organization
FPA	-	Fertilizer and Pesticide Authority
FIDA	-	Fiber Industry Development Authority
NFA	-	National Food Authority
NIA	-	National Irrigation Administration
NSCB	-	National Statistics Coordination Board
NSO	-	National Statistics Office
SRA	-	Sugar Regulatory Administration

OVERVIEW OF THE PHILIPPINE AGRICULTURAL ECONOMY

Economic Performance. Over the last three (3) years, the Philippine economy posted an average annual growth rate of 4.50 percent in terms of GNP and 4.05 percent in terms of GDP. In 2002, the agriculture sector contributed about 19.70 percent to the GDP. In the same year, the growth of the gross value added in agriculture (GVA) slowed down to 3.51 percent or nearly half percent lower than the previous year due primarily to the low growth rate registered by the crop sub-sector.

Population, Employment and Wages. In 2002, the country's population was estimated at around 79.50 million persons, 37 percent of which were dependent on agriculture for their livelihood. The agricultural sector employed an average of 10.72 million persons in the last three years. Although employment was increasing, the proportion of employed persons in agriculture was going down. Average daily wage rate (in nominal terms) in 2001 was posted at P164.60, representing a 0.06 percent increase from the previous year's level. In real terms, average wage rate declined by 5.74 percent.

International Trade. The past three years saw the continued decline in the country's aggregate receipts from agricultural exports. Earnings from total agricultural exports amounted to \$1.79 billion in 2002, lower by 6.49 percent from previous year. Meanwhile, value of agricultural imports reached \$2.79 billion or about 4.6 percent lower than 2001. Agriculture accounted for 5.6 percent of total exports and 9.1 percent of total imports.

Food self-sufficiency. The Philippines has been importing rice to augment local production. In 2002, rice imports reached 1.19 million metric tons valued at \$209.98 million, indicating a self-sufficiency ratio of 87.89 percent. For corn, self-sufficiency ratios ranging 91.0 to 96.35 percent were recorded over the three-year period. The country was almost self-sufficient in pork and chicken. In the case of beef, annual imports comprised at least 14 percent of total supply. The 1999-2001 self-sufficiency ratios for garlic, peanut, mungo and carabeef indicated heavy dependency on imports. Self-sufficiency was attained for chevon in addition to other crops such as coconut, sugarcane, eggplant, cassava, sweet potato and fruits.

Inputs and Other Farm Support Systems. Domestic production of fertilizer in 2002 accounted for 45.6 percent of the total supply. In 2001, 53.9 percent of total fertilizer supply were produced locally.

In 2002, the government provided irrigation services to about 1.39 million hectares of land, approximately 44 percent of the total potential irrigable area in the country. However, irrigation support increased by a mere 0.06 percent from previous year's coverage.

During the last three years, the share of agriculture in the total government expenditures ranged from 3.83 percent to 4.38 percent. The lowest was recorded in 2002 when agricultural expenditures amounted to only P29.42 billion which was 5.1 percent lower than the previous year.

Agricultural production loans amounted to P120.92 billion in 2002 with about 42.59 percent going to food items. Credit support in agriculture has not expanded. From 1.1 percent in 2001, the ratio of agricultural loans to total loans granted even contracted to 1.0 percent in 2002.

Prices. From 2000 to 2002, consumer price index showed an increasing trend. Indices for all items at 1994 prices increased from 152.30 in 2000 to 166.59 in 2002 or an annual average increase of 4.6 percent.

Palay prices recorded significant fluctuations. After decreasing by 2.97 percent in 2001, average farmgate prices grew by 7.96 percent in 2002. Likewise, average prices in 2002 posted an increase of 3.40 percent for wholesale and 2.83 percent for retail. Meanwhile, farm prices of white corn in the same year were higher by 2.78 percent but for the yellow variety, a 1.23 percent decline was registered.

1/ 2000 data on population were from 2000 CPH; 2001 and 2002 data on population were mid-year projections based on 1995 CPH.

2/ NSO based the population projection benchmark used in the Labor Force Survey (LFS) series on the 1995 Census of Population.

3/ Base year (1994) average agricultural wage per day = P80.55; 2002 indices covered only the first semester wage rates for palay (a) and corn (b).

4/ Weighted average rate under the Philippine Dealing System (PDS) starting August 4, 1992; sourced from BSP.

5/ Computed from CPI (base year = 1994); sourced from NSO.

6/ Based on sectoral revised classification, Department of Budget and Management. 2000- 2001 Actual Obligated Expenditures; Adjusted Agricultural Expenditures for 2002, Budget of Expenditures and Sources of Financing Yearbook, Fiscal Year 2003.

7/ Irrigation service area refers to area that is presently provided with irrigation and drainage facilities and where irrigation and drainage services could readily be rendered.

8/ Sourced from ACPC; the 2002 data was estimated using average annual growth rate of 6.2% from 1990-2001. Breakdown of loans granted by thrift banks not yet available.

1/ - backyard

2/ - only Metro Manila reported

Explanatory Note:

Theoretically, the farm price for a specific product is lower than its corresponding wholesale and retail prices. Its retail price in turn is generally higher than its farm and wholesale prices. In this report, there is no one on one correspondence in the commodities monitored. Thus it will be uncommon to find a retail price lower than wholesale price or a farm price higher than wholesale price.
